at work

Upon completion of a massive expansion project totaling \$700 million in Spring 2008, the upcoming MGM Grand at Foxwoods will quadruple the existing areas dedicated to corporate and association meetings, trade shows, and conventions. The expansion will comprise more than 115,000 square feet of brand-new space, including the Northeast's largest ballroom—sized at 50,000 square feet—which will offer unobstructed views in a columnfree setting and scenic garden vistas for outdoor events. An acoustically superior Performing Arts Theater with a seating capacity exceeding 4,000 will be available as well. Currently, groups convene in Foxwood's 55,000 square feet of meeting space, including a 25,000-square-foot ballroom. There are multiple spacious and flexible meeting rooms, all equipped with high-speed wireless Internet access.
